

April 25, 2009

I have had the pleasure of working directly with Brycen Davis during the 2008-09 school year at Dubai American Academy. During this year he acted as my Educational Assistant in teaching Informational Technology to grades KG2, 2 and 3. Brycen's enthusiasm made my year far more enjoyable than I thought possible.

When Brycen first appeared at D.A.A. he did not have any experience teaching but he has a very natural way with the students. The students took an immediate liking to him and we formed a teaching partnership that was much more like team teaching instead of assisting. During this year Brycen has taught lessons, worked with individual students (both high and low achievers), written curriculum, problem-solved, and assisted with the improvement of many of our computer and networking systems. His first few weeks he created a clone for our laboratory and hallway computers that streamlined the student processes and the software availability. His willingness to use his extensive knowledge of anything technological to help people is unsurpassed. At all schools there are a few people who are a little frightened of anything too complicated on the computer, but Brycen's bright nature has put many teachers here at ease.

I would wholeheartedly recommend Brycen Davis for an IT position anywhere within a school. Please contact me if you have any questions regarding my recommendation for Brycen Davis.

Sincerely,

Catrin Barber
IT Teacher, Dubai American Academy
