

## PROFESSIONAL DEVELOPMENT

### Grade 1 Classroom Teacher

As a classroom teacher at IICS over the past 3 years I have had many opportunities to develop my passions as an early years educator. I am committed to creating an autonomous learning environment that allows my students to have both voice and choice. Play-based learning and documentation have been integral in helping me to develop a deeper understanding of my students to better meet their needs and interests. I take pride in sharing the connections and learning experiences that take place daily and have been committed to maintaining an active class site that encourages collaboration and feedback from the wider school community.
